| *Use epinephrine first for | severe symptoms |

# HOW TO USE EPINEPHRINE TO TREAT ANAPHYLAXIS (SERIOUS ALLERGIC REACTION)

There is one dose in each device. If a second dose is needed, use a second device.

If you are giving an epinephrine injection to a young child or infant,
hold their leg firmly in place while administering the injection.

#### **AUVI-Q™** (Epinephrine Injection, USP) Directions

- 1. Pull AUVI-Q up from outer case. This will automatically activate the voice instructions.
- 2. Pull off the red safety guard (labeled "A").
- 3. Place black end (labeled "B") against mid-outer thigh.
- 4. Press firmly and hold for 2 seconds.

## Generic Adrenaclick® (Epinephrine Injection, USP) Auto-Injector Directions

- 1. Remove the outer case.
- 2. Remove gray caps labeled "1" and "2".
- 3. Place red rounded tip (labeled "3") against mid-outer thigh.
- 4. Press down hard until needle enters thigh.
- 5. Hold in place for 10 seconds. Remove from thigh.

#### **EpiPen® Auto-Injector or Generic Directions**

- 1. Remove the EpiPen Auto-Injector from the clear carrier tube.
- 2. Remove the blue safety release (labeled "C") by pulling straight up without bending or twisting it.
- 3. Swing and firmly push orange tip (labeled "D") against mid-outer thigh until it "clicks".
- 4. Hold firmly in place for 3 seconds (count slowly 1, 2, 3).

#### **Neffy® Epinephrine Nasal Spray Directions**

- 1. Remove neffy from packaging. DO NOT TEST PUMP THE DEVICE.
- 2. Hold the device with your thumb on the bottom of the plunger and a finger on either side of the nozzle.
- 3. Insert the nozzle into a nostril until your fingers touch your nose. Keep nozzle straight into the nose pointed toward your forehead.
- 4. Press plunger up firmly until it snaps up and sprays liquid into the nostril.
- 5. If second dose needed, spray into same nostril.
